

Capital Budget Questions

1. Project 40-0037 Environmental Site Assessment Raleigh Avenue

- What are the impacts of deferring this project to a future year?
 - This should be discussed in camera as it relates to a real estate matter
- Why is this land still in City land holdings and for what purpose?
 - The site has been declared surplus however the City still owns it and uses it for snow storage/spoils yard.

2. Project 51-0104 Harbour Park Masterplan

- Can you provide me with the terms of reference for this masterplan and how they differ from previous plans developed along Oshawa's waterfront?
 - No, they're not prepared until the project is approved by Council
- Can you indicate the status of any reserves or monies set aside for waterfront development that could be used for development referenced in this Masterplan?
 - \$339,000 is uncommitted in a capital project account but may be required to fund ongoing monitoring as required by MOE
- Can you provide the maximum funding envelope needed to action this masterplan, including the dredging of materials and construction of a boat launch at the Port?
 - No. Further investigation is required to determine the magnitude of cost.

3. Project 51-0090 Splash Pad Repairs and Upgrades

- Can you provide the locations of the splash pad repairs and upgrades included in the 2019 work plan funded by the budget amount? See chart below

2019 Repairs		
Northview	Water piping replacement and added features	\$40,000
Easton Park	Surface refinishing/repairs	\$10,500
Delpark	Additional seating/shade structure	\$15,000
Baker Park	Spray activator replacement	\$4,500
Lakeview park	Rubber surface repairs	\$5000
	Total	\$75,000

- Can you provide the current condition audit of all splash pads in the City of Oshawa, and the projected costs of any repairs and upgrades beyond that included in project 51-0090?
 - No formal condition audit has been undertaken for splashpads.

Capital Budget Questions

- Can you provide a cost estimate of the construction of a splash pad ranging from the basic cooling station to a neighbourhood or community level water activity centre such as the Kidstown project in the City of Toronto?
 - We will contact the City of Toronto for more information
- Can you provide the amount of money set aside or available in city accounts or reserves for the repair or upgrade of splash pads not included in Project 51-0090?
 - We have \$48,111.94 which is allocated for the construction of Glen Stewart Park Splash pad for 2019.

4. Project 51-0103 Lakeview Parks Playground and Splash Pad-Design

- Are the terms of reference for this consultant study available for Council to review?
 - No, they're not prepared until the project is approved by Council
- Is the consultant study and design limited to the area of the current playground and splash pad?
 - Yes
- Is this study part of the process to facilitate the removal of sport play diamonds and/or soccer fields from the Lakeview Park area to another site?
 - No
- As this project is to facilitate project 51-0110 Construction of Lakeview Park Playground and Splash Pad, can you outline the details of project 51-0110 and the projected timetable for this construction?
 - Based on findings, we will respond to Council as appropriate.
- Can you also provide us with the funding source for project 51-0110?
 - Non DC Growth Related Reserve and the Parks Recreation Trails Development Charge Reserve

5. Project 54-0064 Technical Feasibility Study-Oshawa Creek Main Branch

- As this project is limited to the area between Bloor Street and Wentworth Street West, have additional technical feasibility studies been undertaken for the Oshawa Creek Valley lands adjacent to this study?
 - Not at this time, but they are planned. See projects 54-0017 and 54-0074
- If not, are they required or needed in future years, and if so, when and at what cost?
 - See response above

Capital Budget Questions

- The 2020-2023 capital projection also list the following projects:
 - 54-0012 Oshawa Creek Main Branch Watercourse Improvement Thomas Street to approx. 200m north (\$600,000)
 - 54-0013 Oshawa Creek Main Branch Watercourse Improvement 200m north of Thomas to Wentworth Street (\$600,000)
 - 54-0017 Oshawa Creek Main Branch Watercourse Improvement Hwy 401-CPR (\$1,000,000)
 - 54-0065 Oshawa Creek Main Branch Erie Street Park at pedestrian bridge 1-1007 (\$400,000)
- It appears that none of the projects actually addresses the issues investigated by Project 54-0064, are we undertaking a study with no funding or action plan to address the results of the study?
 - Project 54-0065 Oshawa Creek Main Branch relates to the implementation of the recommendations from the technical feasibility study and is for restoration work related to project 54-0064.
 - Note that the value for restoration work shown is a Class D estimate and will be refined through the completion of the Technical Feasibility Study, 54-0064 (i.e. Dependent on final design/restoration work required)
- In addition, as the above projects total almost \$3m, how are they to be funded and what is the timetable for construction?
 - Funded through Development Charges
 - Construction Timing noted in the forecast
- Also are there any savings to doing the work as one project rather than in phases?
 - No. The scale of the project would be too large and the environmental and fluvial impacts to the creek would be too great at one time. There would also be potential timing impacts related to work within the creek. Regulatory agencies (i.e. CLOCA) would not support this approach.

6. Project 72-0040 Alexandra Park Infrastructure Improvements

- Can you provide the cost breakdown of the component parts of the project?
 - Parking Lot \$700k, Lighting \$150k, Trail \$150k
- What would be the impact of undertaking this work in future years, including the cost of needed maintenance to keep the parking lot open?
 - Parking Lot is highest priority in the City. Investment in localized repairs is not recommended.

Capital Budget Questions

- Is there an option to reduce the size of the parking lot to reduce infrastructure costs?
 - No. Proposed design has balanced City needs and user capacity requirements as efficiently as possible.
- Do we know the makeup of the users of the parking lot? I am informed that a lot of the use is for people accessing the hospital, including hospital employees, who do not want to pay for parking.
 - The parking lot is utilized primarily by sport and park users. There are a few (paid) parking permits provided for some neighbours to park in the lot and this has been available for many years.
- Have staff considered a time limit on parking at the lot to create access for park users and deter those using it to avoid hospital parking charges?
 - There currently is a 4 hour restriction and reducing this time could impact sport use for tournaments.
- Has anyone approached the hospital to fund a portion of the infrastructure improvements as it provides overflow parking for hospital visitors and employees?
 - No. There is no need to because they're not allowed to park there.

7. Project 72-0043 Pavement Repair Program

- What is the cumulative deficiency for parking lot repairs and how much is the projected cost to bring these up to standard?
 - Although 72-0043 is a pavement repair program, bringing these parking lots “up to standard” would require reconstruction. There are 110 parking lots in the City’s portfolio. In collaboration with Engineering Services, we have identified and prioritized 8 parking lots that require complete reconstruction. Design and construction of these parking lots are scheduled to take place between 2019 and 2022. These parking lots include: Alexandra Park (\$700k), Red Tilson Lane (\$250k), Columbus (\$400k), Children’s (\$400k), Donevan (\$850k), Harman (\$350k), Kingside (\$150k) and City Hall (\$500k).
- What locations are to be included in the 2019 work plan funded by this project amount?
 - Prioritized based on condition, and those earmarked for future remove and replacement: Columbus, Children’s, Donevan, Harman, Kingside and City Hall. It is intended that 2019 maintenance will minimize further deterioration until future reconstruction.

Capital Budget Questions

8. Project 74-0041 2019 Asphalt Preservation and Rehabilitation

- What is the cumulative deficiency for Asphalt Preservation and Rehabilitation and how much is the projected cost to bring these up to standard?
 - This program is a renewal program (not replacement) and the goal is to extend the service life.
- What locations are to be included in the 2019 work plan funded by this project amount?
 - Please find attached (Attachment 1) the proposed 2019 Pavement Preservation and Rehabilitation
- Is it possible to include funding for this on-going capital project from Development Charges as growth does impact the life cycle and maintenance cycle of roads? If so, how much would you recommended be added annually to this project envelope from Development Charges?
 - No. The Development Charges Background Study is being reviewed in 2019 and will be presented to Council and will consider the above.

9. Project 74-0056 Pavement Preservation – Preventative

- What is the cumulative deficiency for Pavement Preservation and how much is the projected cost to bring these up to standard?
 - The candidate assets (roads) that are treated under this program are not to be considered deficient. This program is a preventative program which looks to preserve condition by sealing the road surface.
- What locations are to be included in the 2019 work plan funded by this project amount?
 - Please find attached (Attachment 2) the potential list of locations.
- Is it possible to include funding for this on-going capital project from Development Charges as growth does impact the life cycle and maintenance cycle of roads? If so, how much would you recommended be added annually to this project envelope from Development Charges?
 - No. The Development Charges Background Study is being reviewed in 2019 and will be presented to Council and will consider the above.

10. Project 75-0013 Sidewalk rehabilitation

- What is the cumulative deficiency for Sidewalk rehabilitation and how much is the projected cost to bring these up to standard?
 - The sidewalk deficiencies are planned for in the existing budget.

Capital Budget Questions

- What locations are to be included in the 2019 work plan funded by this project amount?
 - The \$200k for sidewalk repairs is for 229 locations. The locations are city wide.
- Is it possible to include funding for this on-going capital project from Development Charges as growth does impact the life cycle and maintenance cycle of roads? If so, how much would you recommended be added annually to this project envelope from Development Charges?
 - No. The Development Charges Background Study is being reviewed in 2019 and will be presented to Council and will consider the above.

11. Project 77-0021 LED signal replacement

- Is there an environmental, safety or fiscal benefit from expanding the number of LED signals in the city and if so, what would be the scale of the cost and the timing to complete?
 - All of our traffic signals are currently LED technology. This is project is for the City's portion of the Region wide 'Traffic Signal LED Replacement Program and Signal Head Modifications' Program. The LEDs are replaced on a 5-year cycle. This is tendered as a Region wide program so there would be economies of scale.
- What locations are to be included in the 2019 work plan funded by this project amount?
 - Mary/Beatrice
 - First/Albert
 - Bond/Division
 - Drew/First
 - Bond east of Claymore
 - Albert/CP Rail Bridge
 - Bond west of Roxborough
 - John/Celina
 - Athol/Central Park
- Is it possible to include funding for this on-going capital project from Development Charges as growth does impact the life cycle and maintenance cycle of roads? If so, how much would you recommended be added annually to this project envelope from Development Charges?
 - No. The Development Charges Background Study is being reviewed in 2019 and will be presented to Council and will consider the above.

Capital Budget Questions

The following are Projects tabled by Council on January 22, 2019

Project Tabled

Project 11-0137 Accessibility Improvements (ODA) Tabled until accessibility list provided

- Capital Project 11-0137 accessibility improvements include the following projects: Blind Square, Children's accessible washroom, Arts Resource Centre accessible counter, Glen Stewart accessible washroom.
- In addition to those projects, there are \$630,000 in proposed capital projects specific to accessibility in 2019.

Project Tabled

Project 11-0340 Brick Cladding for Firehall 1 tabled until estimate provided on windows

- The window preliminary estimate is \$172,000 which was provided in the January 16th Council memo regarding Rotary Pool and Fire Hall No.1 – Condition Audits.

Project Tabled

That Project 11-0319 MLELS Office Relocation to COD be tabled until staff provide lease costs for 2019 and 2020, building operational costs for 2019 and 2020, an accounting of any unexpended funds from COD project, a full breakdown of the \$105,000 expenditure.

- Lease Costs: \$68,000 (2019); \$68,000 (2020)
- Building Operational Costs: \$61,450 (2019); \$62,368 (2020)
- \$105,000 Capital Budget Breakdown: Workstations: \$66,000; Lockers and benches: \$11,500; IT: \$16,000; Moving Costs: \$11,500.
- There are no unexpended funds from the COD project.

2019 CANDIDATE SUMMARY (FORECAST)

*Note: ROAD BASE and ROAD SURFACE might not exactly match the limits of the events/projects listed.

Attachment 1
