
City of Oshawa Integrated Transportation Master Plan & Active Transportation Master Plan Update

Notice of Public Open House (P.O.H.) #2

What is this Study all about?

The City of Oshawa is updating its Integrated Transportation Master Plan (I.T.M.P.) and Active Transportation Master Plan (A.T.M.P.) to guide how people and goods move efficiently throughout the city over the next 30 years. The Study considers all modes of transportation and aims to improve safety, accessibility, connectivity, and sustainability while supporting the City's Strategic Plan objectives. The Study Area includes all lands within the City of Oshawa.

How is the Study being carried out?

This Study is being undertaken in accordance with the requirements of Phases 1 and 2 of the Municipal Class Environmental Assessment (M.C.E.A.) process, which is an approved process under the Environmental Assessment Act, and will follow Approach #1 for Master Plans. The Master Plan will consider improvements within the City of Oshawa's Municipal Boundary.

What will be presented at Public Open House #2?

- Provide an overview of the I.T.M.P. and A.T.M.P. Study and development process;
- Present key feedback received from P.O.H. #1;
- Present the results of two alternative scenarios of transportation network, and seek input on additional alternatives;
- Gather input on transportation facilities, such as sidewalks, cycling lanes, operational improvements, turning lanes, new roads, intersections, traffic calming measures, and transit enhancements (coverage, reliability, frequency), to help refine alternative scenarios;
- Share the evaluation criteria for alternative scenarios, confirm whether they reflect your concerns and values, and invite suggestions for additional criteria;
- Present an updated project schedule; and
- Identify next steps in the I.T.M.P. Study process.

You are invited to participate in this Study!

Your input is important as the project team evaluates transportation network alternatives and identifies preferred alternatives and next steps to support Oshawa's current and future transportation needs.

Anyone with an interest in this Study is invited to attend and participate in our second P.O.H. in-person at the below time and place:

**Civic Recreation Centre (Room 1 & 2)
99 Thornton Rd. S., Oshawa ON L1J 5Y1
Wednesday, June 17, 2026, 6:00 p.m. – 8:00 p.m.**

This will be a “Drop-In” style session, with no formal presentation. Attendees are encouraged to ask questions of the project team and provide feedback at their own pace. Comments on the material presented at P.O.H. #2 may be submitted until noon on Friday, July 17, 2026.

Other ways to participate

If you cannot attend and would like to provide comments, please visit Connect Oshawa (ConnectOshawa.ca/ITMP) to view the project background, complete an online feedback form to identify areas where issues and opportunities may exist along our transportation system. Paper feedback forms are also available at Service Oshawa, located at City Hall (50 Centre St. S.). The project webpage can also be accessed by scanning the QR Code below with your smartphone. Future consultation event notifications will be posted on the project website and emailed to registered individuals at the appropriate time. If you have any questions regarding this Study, please contact one of the following individuals listed below:
